I am a Frontend Developer who loves Javascript. I love learning new tech and constantly try to keep up with ever-growing javascript technologies. I spend my free time reading a lot of frontend related articles and try to implement them into my pet projects. I currently work with Angular, Redux. Immutable and Rxjs as my main tech stack.

SKILLS

JAVASCRIPT / HTML5 / REACT / ANGULAR2 / ANGULARJS / REDUX / IMMUTABLE / RXJS / NODEJS /EXPRESSJS / GIT / CSS3 / SASS

EXPERIENCE

OneDirect - CX Management Firm
March 2017 - Present

Frontend Engineer

As a frontend developer, I work on multiple products, I worked on a lot of custom web pages and components. I am responsible for architecting the front-end workflows for most of their modules and performance optimization of their web apps. I mostly worked on Angular 4, Immutable,Redux and RxJs.

Freelance Frontend Developer
September 2016 - March 2017 (7 months)

Frontend Developer

As a freelance developer, I had to build multiple products from scratch from setting up build process to building reusable components for better maintainability of code, to optimizing them for performance .I had to work with various technologies like React.js, Redux, AngularJS, and Node.js etc to handle clients requirements in the best way possible.

BlackBuck (Zinka Logistics Solutions Pvt. Ltd.)
April 2016 - October 2016 (7 months)

Software Engineer

Being the first frontend developer of the team. I was involved in improving their build and setup process and setting front-end coding standards for their projects. I was mostly working on their internal tool to handle a varied range of tasks. I majorly worked with angular js.

NoBroker
May 2015 - March 2016 (11 months)

Software Development Engineer

As a front-end developer, I worked on mobile website of NoBroker.com mostly. I am also responsible for building their google maps features like fetching Nearby data and showing them on the map for eachproperty along with Map view for their property listings in both desktop and mobile. I majorly worked with backbone.js and jquery.
